

INSTANT VOLCANO SCIENCE EXPERIMENT

with Ermayn & Lauren (303 Nevateem)

This amazing concoction begins with a fizz, then erupts in a bubbling flow of lava!

WHAT YOU WILL NEED:

- 2 small paper cups
- 1/4 cup baking soda
- 1/4 cup vinegar
- 4-6 drops red food coloring
- Tape

HOW TO CONCOCT IT:

1. Fill the bottom of one small paper cup with 1/4 cup baking soda and set it on a plate.
2. Place 4-6 drops of food coloring on top of the baking soda.
3. Poke a hole, about the size of a dime, in the bottom of the second paper cup.
4. Place the second paper cup upside down over the paper cup filled with baking soda.
5. Pour vinegar into the hole until the volcano begins to erupt. The more vinegar you pour into the hole, the more foam the volcano will erupt.
